	Dangers:	This product is not expected to be ha	armful under normal use and adequate

	SEC	TION 5: Fire-fighting measures
5.1	General fire hazards	Fire residues and contaminated extinguishing water must be disposed of in accordance with local official regulations.
	Extinguishing agent Suitable extinguishing media	Fire residues and contaminated extinguishing water must be disposed of in accordance with local official regulations.
	Unsuitable extinguishing media:	Avoid direct water jet; this will disperse and spread the fire
5.2	Special hazards arising from the substance or mixture:	In case of fire, formation of carbon monoxide and carbon dioxide possible
5.3	Advice for firefighters Advice for firefighters:	Keep away from sources of ignition - Do not smoke .
	Special protective equipment for fire fighting:	Wear self-contained breathing apparatus and protective clothing. Do not allow runoff from firefighting materials, even in diluted form, to reach bodies of water, sewers, or drinking water reservoirs. Use ordinary firefighting measures; consider hazards from other materials involved.

personal hygiene.

Do NOT induce vomiting if swallowed. Administer a glass of water.

Treatment:

Safety Data Sheets Complies with Regulation (EC) No 1907/2006 (REACH), Annex II, amended according to Regulation (EU) No 2020/878 Bruxi+ starter set Article no.: No. 93805_A dr. Zdental 14.05.2024 Revised on: Version: 5.0 Replaced version: 4.0 6.1 Personal precautions, protective equipment and Remove all sources of ignition. Wear personal protective emergency procedures: equipment. 6.2 **Environmental protection measures:** Do not allow the runoff to enter the sewer system, waterways or soil 6.3 Methods and material for retention and cleaning: Wipe up spilled material and take to a safe place. Caution:

		Contaminated surfaces may be slippery.
6.4	Reference to other sections:	Caution: Contaminated surfaces may be slippery. Do not allow runoff to reach drains, sewers or bodies of water. For personal protective equipment see section 8 of SDS.

	Section 7: Handling and storage:		
7.1	Protective measures for safe handling:	The product may become electrostatically charged during decanting or decanting. Keep away from food, drink and animal feeding stuffs. Use only in well-ventilated areas. Keep container tightly closed.	
	Notes on fire and explosion protection:	Keep away from sources of ignition - Do not smoke. Store in original container	
7.2	Conditions for safe storage taking into account incompatibilities:	Store the product in the original tightly closed container in a dry and cool place.	
	Storage stability:	The material is stable under normal conditions.	
	Storage class:	Flammable liquids that cannot be assigned to any of the above LGKs	
7.3	Specific end uses:	There are no data available.	

	SECTION 8: Expos	ure controls/personal protective equipment	
8.1	Parameters to be monitored Occupatio exposure limit values	Occupational exposure limits do not apply to any of the ingredients	
	Biological limit values	None(s).	
8.2	Exposure controls Suitable engineerin controls:	g Eye showers and emergency showers must be available in the workplace. Provide adequate general and local exhaust ventilation system.	
	Individual protective measures, for example personal protective equipment		
	General information:	Eye wash bottle with pure water. Do not eat, drink or smoke while working. Wash hands after handlin	
	Eye/face protection:	Safety goggles with side protection according to EN 166	
	Skin protection Hand protection:	Note: There is no risk of contact with chemicals. Use hand protection to avoid mechanical injuries.	
	Other:	Wear suitable protective clothing and goggles/face protection when working.

	SEC	TION 5: Fire-fighting measures
5.1	General fire hazards	Do not allow runoff of fire extinguishing materials, even in diluted form, to reach water bodies, sewage system or drinking water reservoirs. In case of insufficient ventilation, put on breathing apparatus. Remove containers from the fire area as far as this is possible without danger.
	Extinguishing agent Suitable extinguishing media	Use water mist, alcohol-resistant foam, dry chemical or carbon dioxide (CO2) to extinguish flames.
	Unsuitable extinguishing media:	Avoid direct water jets; this will scatter and spread the fire.
5.2	Special hazards arising from the substance or mixture:	Cool containers exposed to fire with a water spray. In case of fire, carbon monoxide and carbon dioxide may be formed. Reacts with bases to liberate flammable gases.
5.3	Advice for firefighters Advice for firefighters:	Keep away from sources of ignition - Do not smoke.
	Special protective equipment for fire fighting:	Fire personnel must wear standard protective equipment, including flame retardant coats, helmets with face shields, gloves, rubber boots, and self-contained breathing apparatus in confined spaces.

Complies with Regulation (EC) No 1907/2006 (REACH), Annex II, amended according to Regulation (EU) No 2020/878

Bruxi+ starter set Article no.: No. 93805_B

SECTION 6: Accidental release measures		
6.1	Personal precautions, protective equipment and emergency procedures:	Remove all sources of ignition. Wear personal protective equipment.
6.2	Environmental protection measures:	Do not allow runoff to enter drains, waterways or soil.
6.3	Methods and material for retention and cleaning:	Absorb with vermiculite, dry sand or soil and place in containers. Thoroughly clean surfaces to remove residual contamination. Caution: Contaminated surfaces may be slippery.
6.4	Reference to other sections:	Do not allow runoff to reach drains, sewers or bodies of water. Caution: Contaminated surfaces may be slippery.

	Section	7: Handling and storage:
7.1	Protective measures for safe handling:	Pack this product in unbreakable containers (no glass containers!) to avoid contact with the substances mentioned in chapter 10. Keep away from food, beverages and animal feed. Use only in well-ventilated areas. Do not eat, drink or smoke while working.
	Notes on fire and explosion protection:	Keep container tightly closed. Store in the original container. Keep away from heat and open flame.
7.2	Conditions for safe storage taking into account incompatibilities:	Store the product in the original tightly closed container in a dry and cool place. Keep away from water, acids, bases, amines, alcohols.
	Storage stability:	The material is stable under normal conditions.
	Storage class:	(TRGS 510): 12
7.3	Specific end uses:	There are no data available.

SECTION 8: Exposure controls/personal protective equipment			
8.1	Parameters to be monitored Occupational exposure limit values	Occupational exposure limits do not apply to any of the ingredients.	
	Biological limit values	None(s).	
8.2	Exposure controls Suitable engineering controls:	No special requirements under normal conditions of use and with adequate ventilation. Eye wash bottle with pure water.	
	Individual protective measures, for example personal protective equipment		
		Eye wash bottle with pure water. Do not eat, drink or smoke when handling the product. Wash hands after handling. Avoid contact with skin and eyes.	
	Eye/face protection:	Safety goggles with side protection according to EN 167

	Section	17: Handling and storage:
7.1	Protective measures for safe handling:	 Provide adequate ventilation and spot extraction at critical points . Do not inhale gas/vapor/aerosol. Avoid contact with skin, eyes and clothing. Wear suitable protective clothing when working. (See section 8.) Information for safe handling Keep away from sources of ignition - Do not smoke. Take measures against electrostatic charges. In the Flammable vapors may accumulate in the vapor space of closed systems. During use formation of explosive/flammable vapor/air mixtures possible. Heating leads to pressure increase and risk of bursting. Information on fire and explosion protection Protective and hygienic measures: See section 8.)
	Notes on fire and explosion protection:	Keep container tightly closed and store in a cool, well-ventilated place. Protect from direct direct sunlight. Ensure sufficient ventilation of the storage room. Ensure that leakages can be collected (e.g. drip pans or collecting surfaces).
7.2	Conditions for safe storage taking into account incompatibilities:	Do not store together with: Gas. Explosives. Flammable solids. Spontaneously combustible (pyrophoric) liquid and solid substances. Self-heating substances or mixtures. Substances and mixtures which, in contact flammable gases in contact with water. Flammable (oxidizing) liquid substances. Flammable (Oxidizing) solids. Ammonium nitrate. Self-reactive substances and mixtures. Organic peroxides. Non-flammable toxic substances. Radioactive substances. Infectious substances.
	Storage stability:	Keep the packaging dry and tightly closed to avoid contamination and absorption of moisture. avoid. Protect against: UV radiation/sunlight. Heat. Humidity Frost. Storage temperature: 15-25°C
	Storage class:	according to TRGS 510: 3 (Flammable liquids)
7.3	Specific end uses:	according to TRGS 510: 3 (Flammable liquids)

	SECTION 8: Exposure controls/personal protective equipment

Exposure controls Suitable engineering controls:	Provide adequate ventilation and spot extraction at critical points.
Individual protective measures, for exam	ple personal protective equipment
General information:	The usual precautions when handling chemicals must be observed .
	Keep away from food, beverages and animal feed.
	Always close containers tightly after removing product. Do not eat, drink, smoke in the workplace,
	snort. Wash hands before breaks and at the end of work. Preventive skin protection with
	skin protection ointment. Remove contaminated clothing and wash before wearing again.
Eye/face protection:	Recommended eye protection brands: Tight-fitting safety goggles. (DIN EN 166)
Skin protection Hand protection:	In case of prolonged or often repeated skin contact: Wear suitable protective gloves.
	Suitable material: butyl rubber.
	Thickness of glove material: 0.5 mm.
	Breakthrough time: >= 480 min. Penetration time (maximum wearing time): ~ 120 min. (estimated)
	If gloves are intended for reuse, clean gloves before removal and store in a well ventilated area .
	Check for tightness / impermeability before use.
	It is recommended to clarify the chemical resistance of the above mentioned protective gloves for specific
	applications with the glove manufacturer.
	The gloves to be used must comply with the specifications of EC Directive 89/686/EEC and the resulting standard
	and the resulting standard EN374.
Other:	Wear flame-resistant/flame-retardant clothing.
	Minimum standards for protective measures when handling working substances are listed in TRGS 500.
Respiratory protection:	Respiratory protection is not required when used properly and under normal conditions .
	Respiratory protection is required for:

Silcofix

Article no.: No. 93801-3

	Aerosol generation/formation
	Actool generation formation
	Exceeding of limit value
	Insufficient ventilation.
	Suitable respiratory protection device: Combination filter device (EN 14387) Filter type: A/P1-3
	It is essential that the respiratory protection filter class is adapted to the maximum pollutant concentration (gas/vapor/aerosol/particles) that may be generated when handling the product. If the concentration is exceeded
	isolation equipment must be used! The wearing time limitations according to GefStoffV in conjunction with the rules for the
	use of respiratory protective equipment (BGR 190) must be observed.
Hygiene measures:	The usual precautions when handling chemicals must be observed .
	Keep away from food, beverages and animal feed.
	Always close containers tightly after removing product. Do not eat, drink, smoke in the workplace,
	snort. Wash hands before breaks and at the end of work. Preventive skin protection with
	skin protection ointment. Remove contaminated clothing and wash before wearing again.
Limitation and monitoring of environmental exposure:	Do not allow uncontrolled release of product into the environment.

	SECTION 9: Physical and chemical properties				
9.1	Information on the basic physical and chemical properties				
	Parameter	Wert			
	State of aggregation	liquid.			
	Colour	Not determined			
	Smell	characteristic			
	Melting point/freezing point	inapplicable			
	Boiling point or initial boiling point and boiling range	inapplicable			
	Flammability	Not determined			
	Lower explosion limit upper explosion limit	Not determined

	Flash point	Not determined		
	Ignition temperature	Not determined		
	Decomposition temperature	Not determined		
	pH value	Not determined		
	Kinematic viscosity	Not determined		
	Solubility	Water solubility: miscible.		
	Partition coefficient n-octanol/water (log value)	Not determined		
	Vapour pressure	Not determined		
	Density and/or specific gravity	Not determined		
	Relative vapour density	Not determined		
	Particle properties	Not determined		
9.2.	Other information Not determined			

SECTION 10: Stability and reactivity					
10.1	Reactivity	There is no information available.			
10.2	Chemical stability	The mixture is chemically stable under the recommended storage, use and temperature conditions.			
10.3	Possibility of hazardous reactions See chapter 10.5.				
10.4	Conditions to avoid	Protect from heat. Risk of ignition! Can form explosive/flammable vapor/air mixtures during use.			
		Heating leads to pressure increase and bursting hazard.			
10.5	Incompatible materials	Substances to avoid: Oxidizing agents, strong. Reducing agents, strong. Strong acid. strong alkali.			
10.6	Decomposition products	In case of fire may evolve: Gases/vapors, irritant. Carbon monoxide. Carbon dioxide (CO2).
